DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by Tuckey.

The patent by Tuckey (5,275,145) shows an intake system (134), a fuel tank (120) including a filler neck with an inlet, a fuel outlet (130), and a vent passage (180) at least partially formed within the filler neck. The fuel outlet and the vent passage each fluidly communicate the fuel tank with the intake system. A fuel tank cap (146) is removably attached to the filler neck and prevents passage of fluid from the fuel tank to the atmosphere.

The fuel tank cap includes a vent assembly. The vent assembly allows fluid communication between an interior of the fuel tank and the intake system through the vent passage when the fuel tank cap is attached to the inlet.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3747

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuckey.

The patent by Tuckey (5,275,145) does not show the fastening means of attaching the fuel tank cap with the filler neck. It is the view of the examiner that it is well known in the art to fasten the fuel tank cap to the filler neck through a threadably engaging means. In the view of the examiner it is an obvious choice of design to fasten the fuel tank cap with a threadable engaging means because no new or unexpected results are achieved.

Allowable Subject Matter

Claim 25 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1, 3, 4, 6-20, 23, and 31-46 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Benton whose telephone number is (571) 272-4838. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Yuen can be reached on (571) 272-4856. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
